

Sales Performance Report

Introduction

This report analyzes the Sales Performance Dashboard to understand lead generation, conversion performance, revenue contribution, and counselor effectiveness. The purpose is to derive meaningful insights and identify improvement areas.

Objective

- Understand overall sales and lead performance
- Analyze conversion trends across lead sources
- Observe counselor-wise contribution
- Identify gaps in the sales funnel

Key Observations

Overall Performance: 29 leads were generated, with 15 conversions, resulting in a 51.72% conversion rate and 7.5 Lakhs in revenue.

Lead Sources: Paid Ads deliver higher-quality leads with better conversion rates, while YouTube generates higher lead volume with lower efficiency.

Counselor Performance: Darshan and Shantanu are top contributors in terms of conversions and revenue.

Funnel Analysis: A significant drop is observed between total leads and connected leads, indicating connectivity as a key challenge.

Time-Based Trends: Higher engagement and conversions occur on Thursdays and Fridays.

Recommendations

- Increase focus and budget on Paid Ads due to higher conversion quality
- Improve lead connection process to reduce drop-offs at early stages
- Share best practices of top-performing counselors with the sales team
- Prioritize follow-ups on high-response days such as Thursday and Friday

Conclusion

The dashboard reflects strong overall sales performance with clear opportunities for improvement. By focusing on lead quality, improving connectivity, and leveraging counselor best practices, sales efficiency and revenue can be further enhanced.
